

Anzar Makrani

EXPERIENCE

Self-Directed (Top 7% TryHackMe) | 2021–2025

- Practiced hands-on labs on TryHackMe, Hack The Box, LetsDefend etc. Focusing on network security, privilege escalation, and enumeration (65+ rooms)
- Simulated and learned real-world attack techniques and defense strategies
- DFIR labs with KAPE & other Eric Zimmerman tools for MS windows, Wireshark & tcpdump for pcap
- Blue team labs for Unified kill chain, pyramid of pain, cyber kill chain, MITRE ATT&CK
- Alert reporting and triage using Splunk (SPL), Microsoft Sentinel (KQL), and Wazuh via Kibana
- Rule Creation in YARA, Snort and Wazuh.

Security and Infrastructure 8+ home labs | 2021–2025

- Installed and configured Linux manually on bare metal
- Self hosted SIEM, IPS, XDR, EDR, ticketing system and other security tools eg: Splunk, Snort, Wazuh, OpenVas etc
- Active Directory lab with OU, GPO, SMB shares, SMB and NTFS permissions etc on Windows Server 2022
- Gained proficiency in shell scripting, administrative tools and package managers
- Managed file systems, user permissions, system updates; automated basic system tasks, docker containers, VMs etc

Education

Bachelor of Computer Applications (BCA) | 2022–2025

- VNSGU, SURAT (76.00%, CGPA: 7.60)
- FIRST CLASS WITH DISTINCTION

Certifications

- Practical Help Desk TCM Security
- Soft Skills for the Job Market TCM Security
- CompTIA Network+ and Security+ (Self-studied – Equivalent knowledge)

Technical skills

- **Security:** Pentesting, SOC (THM, HTB, PicoCTF etc)
- **Networking:** OSI Model, IP, TCP/UDP, DNS, HTTP etc
- **OS:** Linux (Arch, Kali, Ubuntu, etc.), Windows, Android
- **Web Dev:** HTML, CSS, JS, PHP
- **App Dev:** Flutter, Dart, Kotlin, Java, XML
- **Tools:** Git, Android Studio, Neovim, postman etc
- **Databases:** MySQL, SQLite, Firebase, Supabase

Projects

Web Development Projects

HTML | CSS | JS | Firebase | Supabase

- Developed an admin-student-teacher portal with authentication, data storage, and user roles.
- Used Firebase Realtime Database for backend; added input validation and UI components.
- Created and hosted multiple responsive static websites using Firebase/Supabase as backend for storage and auth.
- Focused on clean design, mobile responsiveness, and performance.

Android App Projects

Flutter | Kotlin | Java | Firebase | Supabase | SQLite

- Built multiple Android apps featuring login, local data storage (SQLite), cloud sync (Supabase), and responsive designs.
- Experience in file-based JSON handling
- Learned lifecycle management, data persistence, state management and API handling.

Soft skills

- Fast learner and autodidact
- Strong research and documentation habits
- Problem solving and analytical thinking
- Adaptable and curious across tech stacks

Additional skills

- Experience in reverse engineering Android APKs, analyzing application behavior and structure
- Typing Speed of 100–110 WPM (Top 28% Monkeytype)

Hobbies

- **Competitive Chess:** Top 3-4% global player (Chess.com). Rapid: 1538, Blitz: 1529, Bullet: 1607
- **Logic Puzzles:** Sudoku, Wordle, Crossword etc
